## TABLE OF CONTENTS

<b>INTRODUCTION</b> .....	<b>3</b>
<b>ACCESS TO CARE</b> .....	<b>5</b>
CHILDREN AND ADOLESCENTS’ ACCESS TO PRIMARY CARE PRACTITIONERS (CAP) .....	6
ANNUAL DENTAL VISITS (ADV) .....	11
<b>USE OF SERVICES</b> .....	<b>13</b>
WELL-CHILD VISITS IN THE FIRST 15 MONTHS OF LIFE (W15) .....	16
WELL-CHILD VISITS IN THE 3RD, 4TH, 5TH AND 6TH YEARS OF LIFE (W34) .....	19
ADOLESCENT WELL-CARE VISITS (AWC) .....	21
AMBULATORY CARE (AMB) .....	23
Ambulatory Care – Emergency Department Visits .....	23
Ambulatory Care - Outpatient Visits .....	28
INPATIENT UTILIZATION - GENERAL HOSPITAL/ACUTE CARE (IPU) .....	30
Total Inpatient Utilization - Discharges .....	30
Total Inpatient Utilization – Average Length of Stay .....	31
IDENTIFICATION OF ALCOHOL AND OTHER DRUG SERVICES (IAD) .....	33
MENTAL HEALTH UTILIZATION (MPT).....	35
<b>EFFECTIVENESS OF CARE</b> .....	<b>38</b>
WEIGHT ASSESSMENT AND COUNSELING FOR NUTRITION AND PHYSICAL ACTIVITY (WCC) .....	41
CHILDHOOD IMMUNIZATION STATUS (CIS) .....	53
IMMUNIZATIONS FOR ADOLESCENTS (IMA).....	66
HUMAN PAPILOMAVIRUS VACCINE FOR FEMALE ADOLESCENTS (HPV).....	70
LEAD SCREENING IN CHILDREN (LSC) .....	72
CHLAMYDIA SCREENING IN WOMEN (CHL) .....	74
APPROPRIATE TESTING FOR CHILDREN WITH PHARYNGITIS (CWP) .....	76
APPROPRIATE TREATMENT FOR CHILDREN WITH UPPER RESPIRATORY INFECTION (URI) .....	78
USE OF APPROPRIATE MEDICATIONS FOR PEOPLE WITH ASTHMA (ASM) .....	80
FOLLOW-UP CARE FOR CHILDREN PRESCRIBED ADHD MEDICATION (ADD) .....	84
FOLLOW UP CARE AFTER HOSPITALIZATION FOR MENTAL ILLNESS (FUH) .....	87

## INTRODUCTION

---

As part of the Balanced Budget Act of 1997, the United States Congress created Title XXI, the State Children's Health Insurance Program (CHIP), to address the growing problem of children without health insurance. SCHIP was designed as a federal/state partnership, similar to Medicaid, with the goal of expanding health insurance to children whose families earn too much money to be eligible for Medicaid, but not enough money to purchase private insurance. In 1998, the State legislature repealed the existing Children's Health Care Act and enacted Act 1998-68 to establish the current Pennsylvania (PA) CHIP. On April 16, 2015, President Barack Obama signed into law H.R.2: Medicare Access and CHIP Reauthorization Act of 2015 which reauthorized and finances CHIP through Fiscal Year 2017.

PA CHIP is administrated through the Pennsylvania Insurance Department (PID). The program is supported by both state and federal funds. The program provides payment for health care coverage for eligible children who meet income and other criteria. Approximately 149,000 children are enrolled in PA CHIP as of October 2015.

In order for a child to qualify for free or subsidized PA CHIP, the family's income must fall within a certain range **and** the child must:

- Not be eligible for Medicaid or have any other health insurance
- Be under age 19
- Be a citizen of the United States, a permanent legal alien or a refugee as determined by the U.S. Immigration and Naturalization Service
- Be a Pennsylvania resident

Children enrolled in the PA CHIP program receive comprehensive medically necessary or appropriate health care benefits, including but not limited to:

- Immunizations
- Routine check-ups
- Prescription drugs
- Dental care
- Vision and eye care
- Maternity care
- Mental health benefits
- Up to 90 days hospitalization/year
- Durable medical equipment
- Substance abuse treatment
- Partial hospitalization for mental health services
- Rehabilitation therapies
- Home health care
- Hospice and Palliative services
- Medically necessary orthodontia
- Autism spectrum disorder and related services

## Health Plans in this Report

This report presents data collected from ten health plans (contractors) that provide health care benefits for PA CHIP enrollees.

- *Aetna*: Aetna Health, Inc.
- *Capital Blue Cross (CBC)*: Capital Blue Cross through Keystone Health Plan Central
- *First Priority Health (FPH)*: Blue Cross of Northeastern PA
- *Geisinger (GHP)*: Geisinger Health Plan
- *Highmark Blue Cross/Blue Shield (HBCBS)*: Highmark Inc. through Highmark Blue Cross Blue Shield
- *Highmark Blue Shield (HBS)*: Highmark Inc. through Highmark Blue Shield
- *Keystone Health Plan East (KHPE)*: Independence Blue Cross
- *Kidz Partners (HPHP)*: Health Partners of Philadelphia, Inc
- *UnitedHealthcare (UHCP)*: UnitedHealthcare Community Health Plan
- *UPMC for Kids (UPMC)*: UPMC Health Plan

## Methodology

Information in the Comprehensive Performance Report is drawn primarily from Healthcare Effectiveness Data and Information Set (HEDIS<sup>®1</sup>) performance measures, which are a standard set of performance measures developed by the National Committee for Quality Assurance (NCQA<sup>™</sup>). Rates for HEDIS<sup>®</sup> 2015 measures listed throughout this report reflect services delivered during the 2014 calendar year (CY), or where applicable, in CY 2013. Similarly, HEDIS<sup>®</sup> 2014 rates reflect services delivered during CY 2013 and CY 2012, with HEDIS<sup>®</sup> 2013 rates reflecting services delivered during CY 2012 and CY 2011 where applicable.

The 2015 PA CHIP HEDIS<sup>®</sup> Comprehensive Performance Report is organized with performance measures grouped by HEDIS<sup>®</sup> domain into three sections: Access to Care, Use of Services and Effectiveness of Care. For each performance measure, a measure description is provided followed by results and analyses, including narrative analysis, tables and graphs where applicable. Comparison tables including Medicaid Managed Care (MMC) National HMO only, MMC Regional (Mid-Atlantic region: New Jersey, New York, Pennsylvania) HMO only and PA MMC benchmarks are also included when available. Year over year comparisons and comparisons to benchmarks are made based on percentage point differences.

## ACCESS TO CARE

HEDIS® 2015 Measure	Description
<b>Children and Adolescents' Access to Primary Care Practitioners (CAP)</b>	The percentage of children 12 months to 6 years old who had a visit with a primary care practitioner within the last year or for children 7-19 years old, within the last two years.
<b>Annual Dental Visit (ADV)</b>	The percentage of enrolled members 2 to 19 years old who had at least one dental visit during the measurement year.

### Exhibit 1

HEDIS® 2015 Measure	PA CHIP Weighted Average	PA MMC Weighted Average
<b>Children and Adolescents' Access to Primary Care Practitioners (CAP)</b>		
CAP: Ages 12 - 24 months	98.28%	97.01%
CAP: Ages 25 months - 6 years	93.63%	88.64%
CAP: Ages 7 - 11 years	95.63%	91.89%
CAP: Ages 12 - 19 years	95.29%	90.15%
<b>Annual Dental Visits (ADV)</b>		
ADV: Ages 2 - 3 years	39.79%	42.56%
ADV: Ages 4 - 6 years	74.88%	66.5%
ADV: Ages 7 - 10 years	80.31%	66.37%
ADV: Ages 11 - 14 years	76.56%	61.54%
ADV: Ages 15 - 18 years	67.71%	53.46%
ADV: Age 19 years	63.61%	NA
ADV: Ages 2 - 19 years Total Rate*	72.42%	58.20%

- Medicaid ADV total rate includes members 2- 21 years of age
- NA = PA Medicaid rate is not available for this age group

## CHILDREN AND ADOLESCENTS' ACCESS TO PRIMARY CARE PRACTITIONERS (CAP)

### Measure Description

The Children and Adolescents' Access to Primary Care Practitioners measure assesses the percentage of children 12 to 24 months old and 25 months to six years old who had a visit with a Primary Care Practitioner (PCP), and who were continuously enrolled during the measurement year.

For children seven to 11 years old and adolescents 12 to 19 years old, this measure assesses the percentage of children and adolescents who were continuously enrolled during the current measurement year and the year prior to the measurement year who had a visit with a PCP during the current measurement year or the year prior to the current measurement year.

### CAP 12-24 Months: Results

Table 1.0

CAP Ages 12-24 Months	HEDIS 2015
PA CHIP Weighted Average	98.28%
PA Medicaid Weighted Average	97.01%
Quality Compass Percentile Benchmark Met – National	90 <sup>th</sup> percentile
Quality Compass Percentile Benchmark Met – Regional	66.67 <sup>th</sup> percentile

### CAP 12-24 Months: Analysis

The PA CHIP HEDIS<sup>®</sup> 2015 weighted average was 98.28%, which was a 0.72 percentage point increase from the HEDIS<sup>®</sup> 2014 weighted average of 97.56%. Nine PA CHIP contractors reported rates for this measure with six contractors reporting increased rates, one contractor reporting a similar rate and one contractor reporting a decreased rate from HEDIS<sup>®</sup> 2014 to HEDIS<sup>®</sup> 2015. Access rates ranged from a low of 91.84% to a high of 100.00%.

Table 1.1: Children and Adolescents' Access to Primary Care Practitioners Ages 12-24 Months

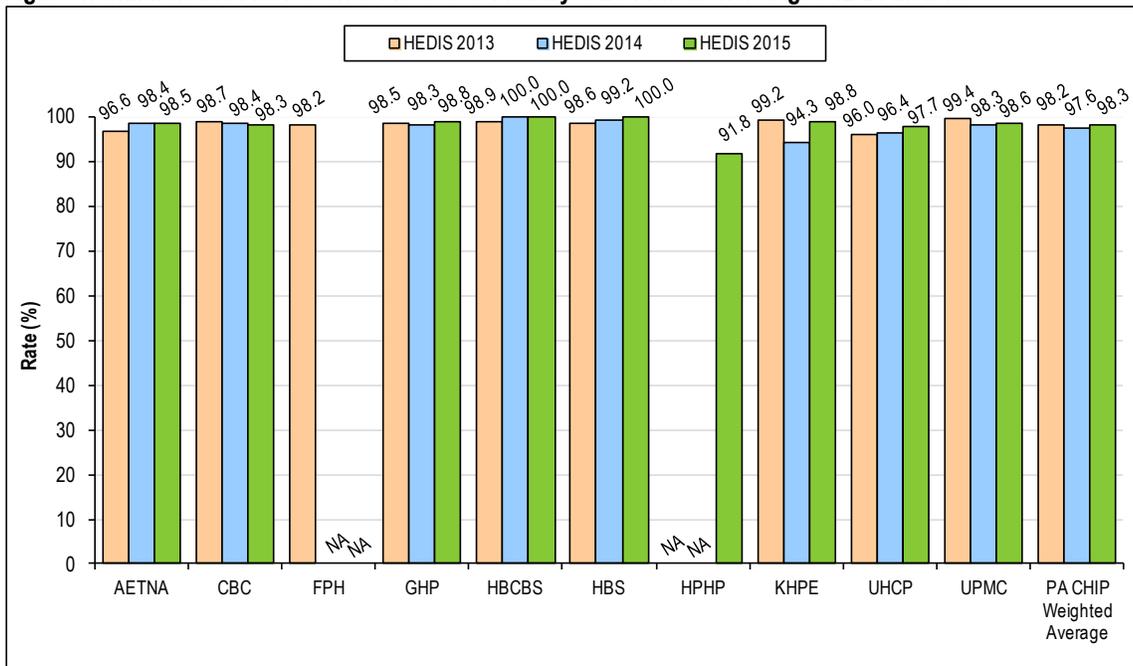

HEDIS 2013	HEDIS 2014	HEDIS 2015	PA CHIP Contractor
98.91 ↑	100.00 ↑	100.00 –	Highmark BC/BS

### **CAP 25 Months – 6 Years: Results**

**Table 1.2**

CAP Ages 25 Months – 6 Years	HEDIS® 2015
PA CHIP Weighted Average	93.63%
PA Medicaid Weighted Average	88.64%
Quality Compass Percentile Benchmark Met – National	90 <sup>th</sup> percentile
Quality Compass Percentile Benchmark Met – Regional	95 <sup>th</sup> percentile

### **CAP 25 Months – 6 Years: Analysis**

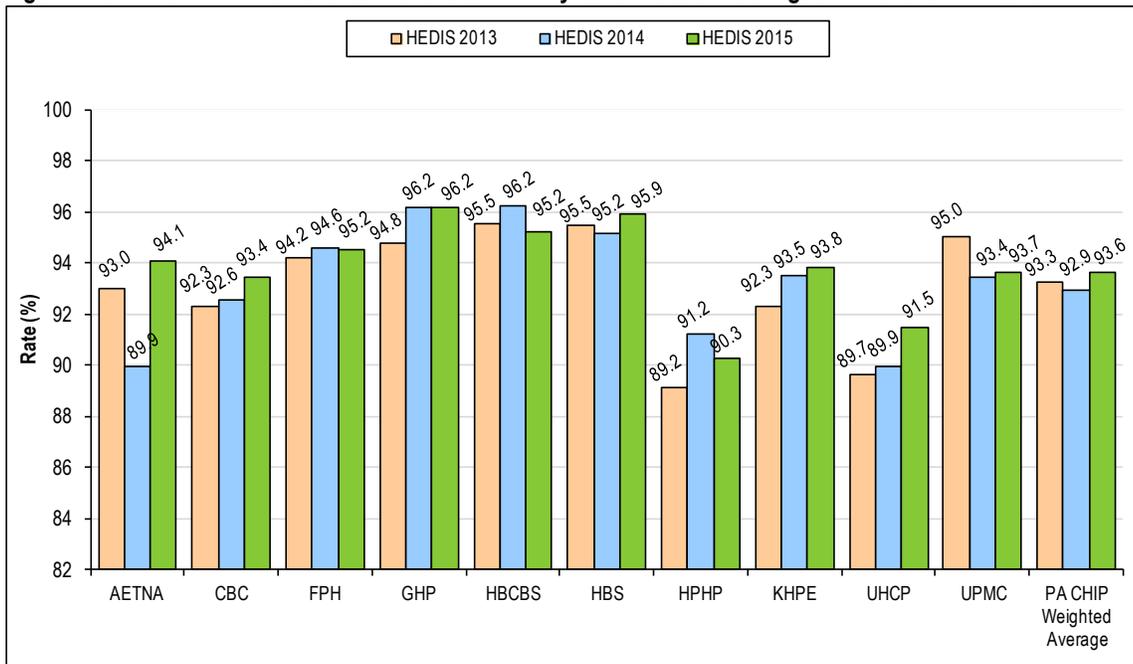

The PA CHIP HEDIS® 2015 weighted average was 93.63%, which was a 0.69 percentage point increase from the HEDIS® 2014 weighted average of 92.94%. Ten PA CHIP contractors reported rates for this measure with six contractors reporting increased rates and four contractors reporting decreased rates from HEDIS® 2014 to HEDIS® 2015. Access rates ranged from a low of 90.26% to a high of 96.16%.

**Table 1.3: Children and Adolescents' Access to Primary Care Practitioners Ages 25 Months – 6 Years**

HEDIS® 2013	HEDIS® 2014	HEDIS® 2015	PA CHIP Contractor

- Bold numbering identifies rates that are above the PA CHIP weighted average  
 - ↑ ↓ represents a comparison with the prior year's rate

**Figure 2: Children and Adolescents' Access to Primary Care Practitioners Ages 25 Months – 6 Years**

## CAP 7-11 Years: Results

**Table 1.4**

CAP Ages 7-11 Years	HEDIS® 2015
PA CHIP Weighted Average	95.63%
PA Medicaid Weighted Average	91.89%
Quality Compass Percentile Benchmark Met – National	75 <sup>th</sup> percentile
Quality Compass Percentile Benchmark Met – Regional	50 <sup>th</sup> percentile

### CAP 7-11 Years: Analysis

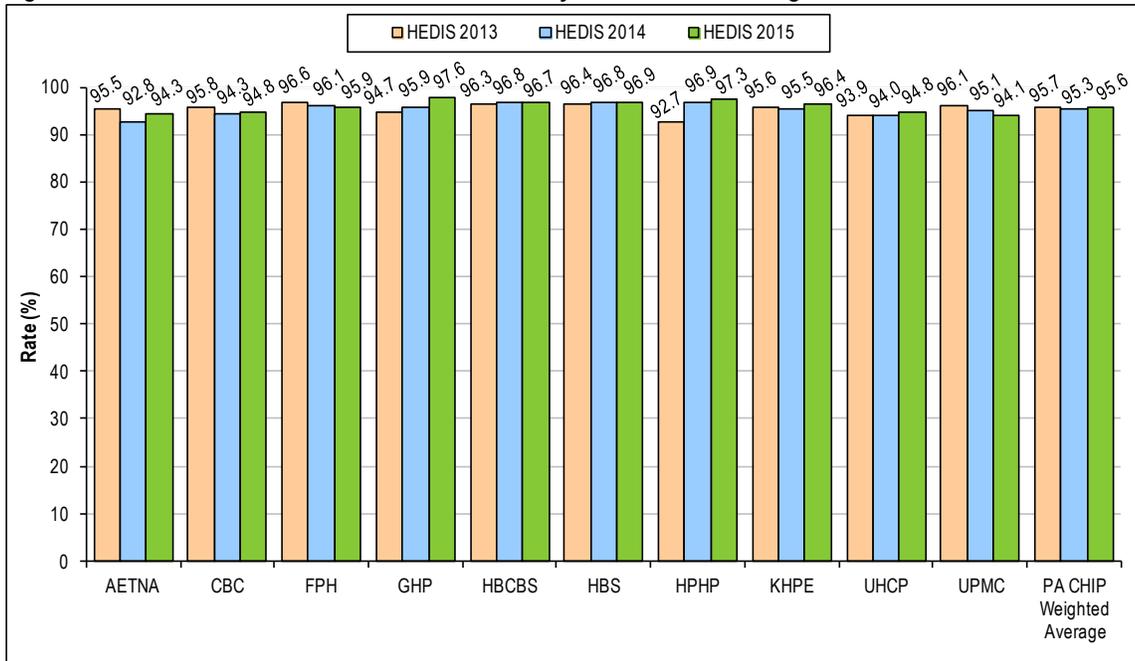

The PA CHIP HEDIS<sup>®</sup> 2015 weighted average was 95.63%, which was a 0.36 percentage point increase from the HEDIS<sup>®</sup> 2014 weighted average of 95.27%. Ten PA CHIP contractors reported rates for this measure with seven contractors reporting increased rates and three contractors reporting decreased rates from HEDIS<sup>®</sup> 2014 to HEDIS<sup>®</sup> 2015. Access rates ranged from a low of 94.12% to a high of 97.63%.

**Table 1.5: Children and Adolescents' Access to Primary Care Practitioners Ages 7 – 11 Years**

HEDIS 2013	HEDIS 2014	HEDIS 2015	PA CHIP Contractor

## ANNUAL DENTAL VISITS (ADV)

### Measure Description

This measure assesses the percentage of children and adolescents two to 19 years old who were continuously enrolled during the measurement year, and who had a dental visit during the measurement year.

### ADV: Results

Table 1.8

ADV Ages 2-19 Years	HEDIS 2015
PA CHIP Weighted Average	72.42%
PA Medicaid Weighted Average*	58.20%
Quality Compass Percentile Benchmark Met – National*	95 <sup>th</sup> percentile
Quality Compass Percentile Benchmark Met – Regional*	95 <sup>th</sup> percentile

- Medicaid rate and benchmarks include members 2-21 years old

### ADV: Analysis

The PA CHIP HEDIS<sup>®</sup> 2015 Annual Dental Visits for Children two to 19 years old weighted average was 72.42% which was 2.58 percentage points above the HEDIS<sup>®</sup> 2014 weighted average of 69.84%. Ten PA CHIP contractors reported rate increases from HEDIS<sup>®</sup> 2014 to HEDIS<sup>®</sup> 2015 for this measure, with dental visit rates ranging from a low of 62.24% to a high of 79.16%.

## USE OF SERVICES

HEDIS 2015 Measure	Description
<b>Well-Child Visits in the first 15 months of Life (W15)</b>	The percentage of children who turned 15 months old who had between zero and six or more well-child visits with a PCP during their first 15 months of life.
<b>Well-Child Visits in the 3rd, 4th, 5th and 6th years of life (W34)</b>	The percentage of children three, four, five or six years of age who had one or more well-child visits with a primary care practitioner during the measurement year.
<b>Adolescent Well-Care Visits (AWC)</b>	The percentage of enrolled members 12 to 19 years of age who had at least one comprehensive well-care visit with a primary care practitioner or an OB/GYN practitioner during the measurement year.
<b>Ambulatory Care (AMB)</b>	Summary of the utilization of ambulatory services including outpatient visits and emergency department visits.
<b>Inpatient Utilization - General Hospital/Acute Care (IPU)</b>	Summary of the utilization of acute inpatient services including medicine, surgery, maternity and total services.
<b>Identification of Alcohol and Other Drug Services (IAD)</b>	Number and percentage of members with an alcohol and other drug claim who received any chemical dependency service including inpatient, intensive outpatient of partial hospitalization, outpatient or emergency department services.
<b>Mental Health Utilization (MPT)</b>	Number and percentage of members receiving any mental health service including inpatient, intensive outpatient of partial hospitalization, outpatient or emergency department services.

## WELL-CHILD VISITS IN THE FIRST 15 MONTHS OF LIFE (W15)

### Measure Description

This measure assesses the percentage of enrollees who turned 15 months old during the measurement year, who were continuously enrolled from 31 days of age through 15 months of age who had zero, one, two, three, four, five or six or more well-child visits with a PCP during their first 15 months of life.

### W15 - 4 Visits: Results

Table 2.0

W15 - 4 Visits	HEDIS 2015
PA CHIP Weighted Average	4.18%
PA Medicaid Weighted Average	8.98%
Quality Compass Percentile Benchmark Met – National	Below 10 <sup>th</sup> percentile
Quality Compass Percentile Benchmark Met – Regional	Below 10 <sup>th</sup> percentile

### W15 - 4 Visits: Analysis

The PA CHIP HEDIS<sup>®</sup> 2015 weighted average was 4.18%, which was a 0.62 percentage point increase from the HEDIS<sup>®</sup> 2014 weighted average of 3.56%. Eight PA CHIP contractors reported rates for this measure with five contractors reporting increased rates and two contractors reporting decreased rates from HEDIS<sup>®</sup> 2014 to HEDIS<sup>®</sup> 2015. Well-child visit rates ranged from a low of 0.68% to a high of 9.41%.

Table 2.1: Well Child Visits in the First 15 Months – 4 Visits

## WELL-CHILD VISITS IN THE 3RD, 4TH, 5TH AND 6TH YEARS OF LIFE (W34)

### Measure Description

This measure assesses the percentage of enrollees who were three, four, five or six years old during the measurement year, who were continuously enrolled during the measurement year and who had one or more well-child visits with a PCP during the measurement year.

### W34: Results

Table 2.6

W34	HEDIS 2015
PA CHIP Weighted Average	82.35%
PA Medicaid Weighted Average	76.36%
Quality Compass Percentile Benchmark Met – National	75 <sup>th</sup> percentile
Quality Compass Percentile Benchmark Met – Regional	75 <sup>th</sup> percentile

### W34: Analysis

The PA CHIP HEDIS<sup>®</sup> 2015 weighted average was 82.35%, which was a 1.14 percentage point increase from the HEDIS<sup>®</sup> 2014 weighted average of 81.21%. Ten PA CHIP contractors reported rates for this measure, with six contractors reporting increased rates and four contractors reporting decreased rates from HEDIS<sup>®</sup> 2014 to HEDIS<sup>®</sup> 2015. Well-child visit rates ranged from a low of 76.01% to a high of 86.96%.

## ADOLESCENT WELL-CARE VISITS (AWC)

### Measure Description

This measure assesses the percentage of enrollees 12 to 19 years old, who were continuously enrolled during the measurement year and who had at least one comprehensive well-care visit with a PCP or OB/GYN during the measurement year.

### AWC: Results

Table 2.8

AWC	HEDIS 2015
PA CHIP Weighted Average	63.96%
PA Medicaid Weighted Average*	58.68%
Quality Compass Percentile Benchmark Met – National*	75 <sup>th</sup> percentile
Quality Compass Percentile Benchmark Met – Regional*	66.67 <sup>th</sup> percentile

- Medicaid rate and benchmarks include members 12-21 years old

### AWC: Analysis

The PA CHIP HEDIS<sup>®</sup> 2015 weighted average was 63.96%, which was a 2.01 percentage point increase from the HEDIS<sup>®</sup> 2014 weighted average of 61.95%. Ten PA CHIP contractors reported rates for this measure. Adolescent well-care visit rate increases were observed for nine contractors, with the rate for one contractor decreasing from HEDIS<sup>®</sup> 2014 to HEDIS<sup>®</sup> 2015. Adolescent well visit rates ranged from a low of 60.54% to a high of 70.14%.

## AMBULATORY CARE (AMB)

### Measure Description

The ambulatory care measure summarizes utilization of ambulatory care in outpatient visits and emergency department visits for children less than one year old, one to nine years old, 10 to 19 years old and less than one to 19 years old. This measure is an inverted measure with a lower rate representing better performance.

### Ambulatory Care – Emergency Department Visits

#### AMB ED Visits <1-19 Years: Results

Table 2.10

AMB ED Visits/1000 MM Ages <1 – 19 Years	HEDIS 2015
PA CHIP Weighted Average	27.94
PA Medicaid Weighted Average*	54.51
Quality Compass Percentile Benchmark Met – National**	NA
Quality Compass Percentile Benchmark Met – Regional**	NA

\* Medicaid benchmarks are not available for the <1-19 age range

\*\* Rate calculated for comparison with CHIP rates

#### AMB ED Visits <1-19 Years: Analysis

The PA CHIP HEDIS<sup>®</sup> 2015 Ambulatory Care – ED Utilization total weighted average for children less than one year old to 19 years old was 27.94 visits/1000 MM. This was 0.43 visits/1000 MM below the HEDIS<sup>®</sup> 2014 rate of 28.37 visits/1000 MM. Ten PA CHIP contractors reported rates for this inverted measure. Eight contractors reported decreased rates and two contractors reported increased rates from HEDIS<sup>®</sup> 2014 to HEDIS<sup>®</sup> 2015. Emergency department utilization rates ranged from a low of 21.35 visits/1000 MM to a high of 31.95 visits/1000 MM.

#### AMB OP Visits <1-19 Years: Analysis

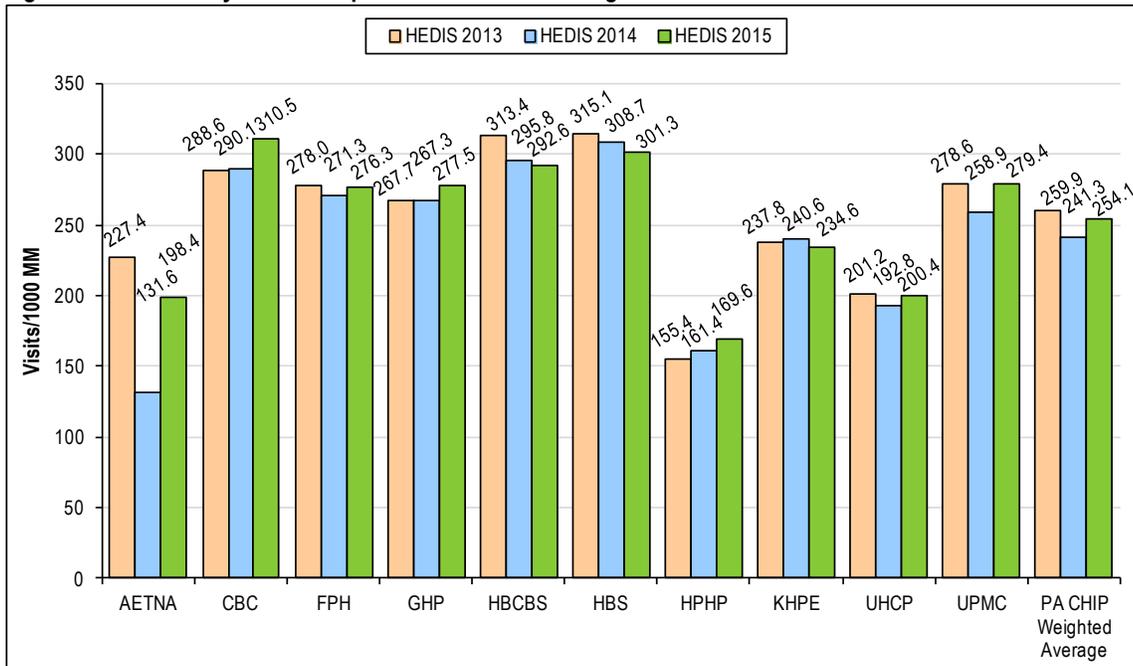

At 251.80 visits/1000 MM, the PA CHIP HEDIS<sup>®</sup> 2015 Outpatient Visits Utilization weighted average for children less than one to 19 years old was 10.55 visits/1000 MM above the HEDIS<sup>®</sup> 2014 rate of 241.25 visits/1000 MM. Ten PA CHIP contractors reported rates for this measure with three contractors reporting decreased rates and seven contractors reporting increased rates from HEDIS<sup>®</sup> 2014 to HEDIS<sup>®</sup> 2015. Outpatient Visit rates ranged from a low of 169.63 visits/1000 MM to a high of 310.49 visits/1000 MM.

**Table 2.19: Ambulatory Care – Outpatient Visits/1000 MM Ages <1-19 Years**

## INPATIENT UTILIZATION - GENERAL HOSPITAL/ACUTE CARE (IPU)

### Measure Description

The Inpatient Utilization measure summarizes utilization of acute inpatient services in medicine, maternity, surgery and total services for children less than one, one to nine, 10 to 19 years old and less than one to 19 years old. This measure is an inverted measure with a lower rate representing better performance.

### Total Inpatient Utilization - Discharges

#### IPU Total Discharges <1-19 Years: Results

Table 2.20

PA CHIP Average	0.91
PA Medicaid Average*	2.84
Quality Compass Percentile Benchmark Met – National**	NA
Quality Compass Percentile Benchmark Met – Regional**	NA

- Calculated for comparison with CHIP rates
- Medicaid benchmarks are not available for the <1-19 age range

#### IPU Total Discharges <1-19 Years: Analysis

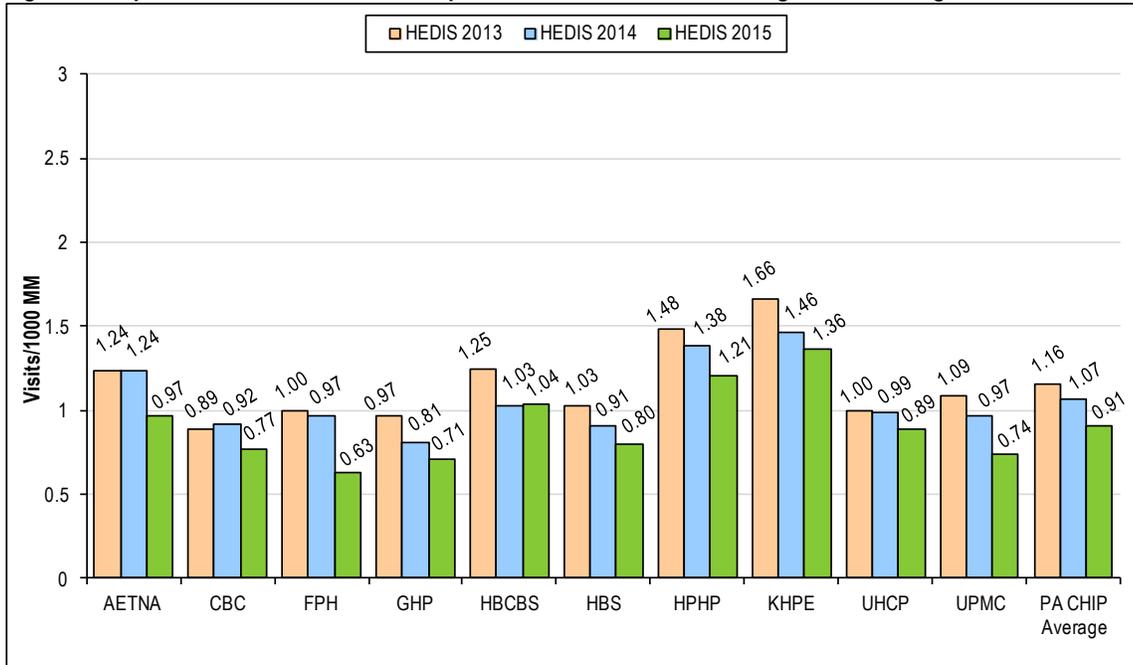

The PA CHIP HEDIS® 2015 Total Inpatient Utilization rate of 0.91 discharges/1000 MM for members less than one to 19 years old was 0.16 discharges/1000 MM below the HEDIS® 2014 rate of 1.07 discharges/1000 MM. Ten PA CHIP contractors reported rates for this measure. Nine contractors reported decreased rates while one contractor reported an increased rate from HEDIS® 2014 to HEDIS® 2015. Total inpatient discharge rates ranged from a low of 0.63 discharges/1000 MM to a high of 1.36 discharges/1000 MM.

 - Calculated for comparison with CHIP rates

**IPU Total ALOS <1-19 Years: Analysis**

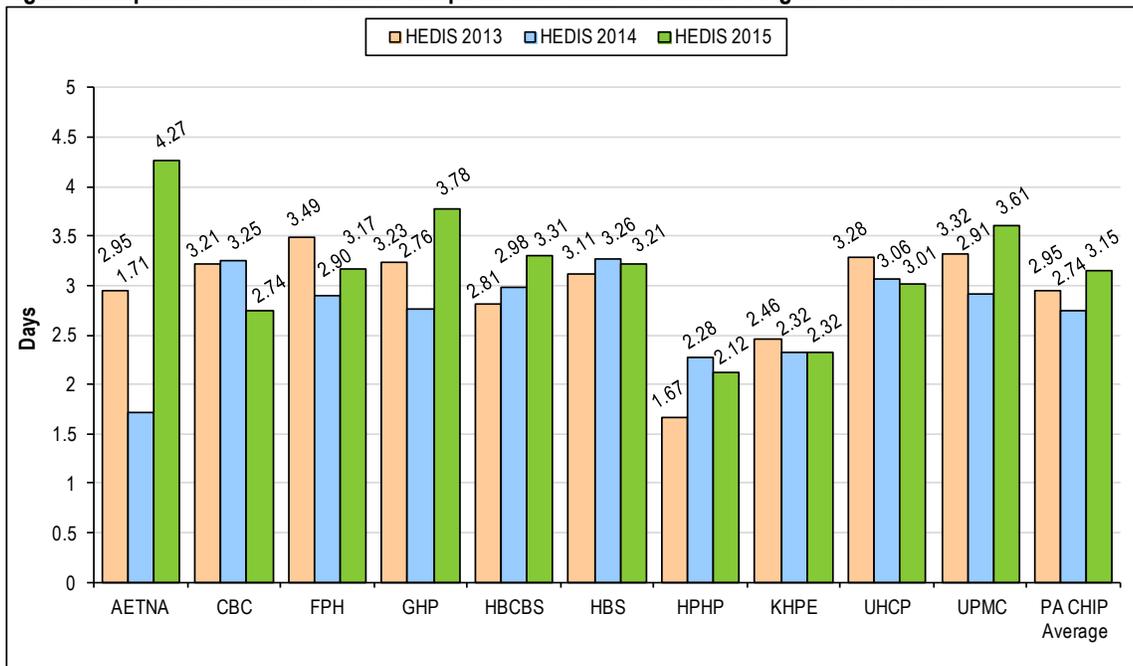

The PA CHIP HEDIS® 2015 Total Inpatient Discharges Average Length of Stay (ALOS) for children less than one to 19 years old at 3.15 days was 0.41 days above the HEDIS® 2014 rate of 2.74 days. Ten PA CHIP contractors reported rates for this measure. Four contractors reported decreased average length of stay, one contractor reported a similar average length of stay and five contractors reported increased average length of stay from HEDIS® 2014 to HEDIS® 2015. Total inpatient average length of stay ranged from a low of 2.12 days to a high of 4.27 days.

## IDENTIFICATION OF ALCOHOL AND OTHER DRUG SERVICES (IAD)

### Measure Description

Identification of alcohol and other drug services reports the number and percentage of members zero to 12 years old and 13 to 17 years old with an alcohol and other drug (AOD) claim, who received any service, inpatient, intensive outpatient or partial hospitalization or outpatient or emergency department chemical dependency services during the measurement year.

### IAD Any Service 13-17 Years: Analysis

The PA CHIP HEDIS® 2015 Identification of Alcohol and Other Drug Services – Any Service rate for adolescents 13 to 17 years old at 1.04% was 0.14 percentage points below the HEDIS® 2014 rate of 1.18%. Ten PA CHIP contractors reported rates for this measure. Two contractors reported increased rates and eight contractors reported decreased rates from HEDIS® 2014 to HEDIS® 2015. Any service rates ranged from a low of 0.51% to a high of 1.47%.

## MENTAL HEALTH UTILIZATION (MPT)

### Measure Description

The Mental Health Utilization measure reports the number and percentage of members who received any mental health service including inpatient, intensive outpatient or partial hospitalization and outpatient or emergency department services during the measurement year.

### MPT Any Service 0-12 Years - Total Rate: Analysis

At 5.66%, the PA CHIP HEDIS® 2015 Mental Health Utilization – Any Service rate for children zero to 12 years old was 0.67 percentage points below the HEDIS® 2014 rate of 6.33%. Ten PA CHIP contractors reported rates for this measure with four contractors reporting increased rates and six contractors reporting decreased rates from HEDIS® 2014 to HEDIS® 2015. Mental health utilization rates ranged from a low of 2.56% to a high of 9.26%.

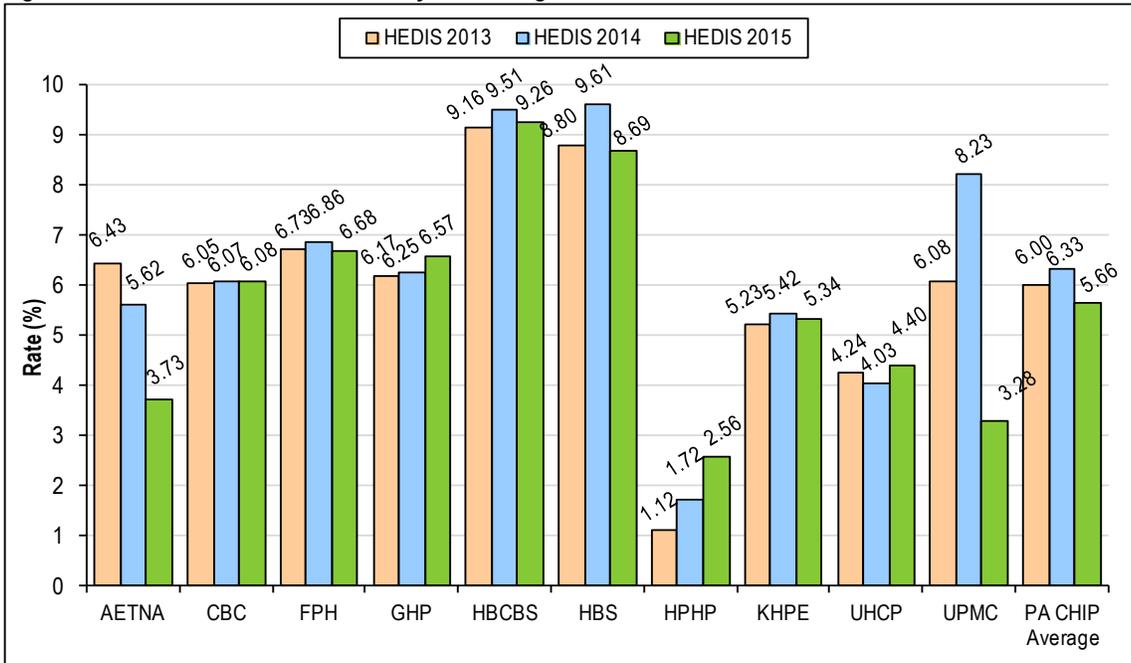

**Table 2.25: Mental Health Utilization – Any Service Ages 0-12 Years - Total Rate**

**MPT Any Service 13-17 Years: Analysis**

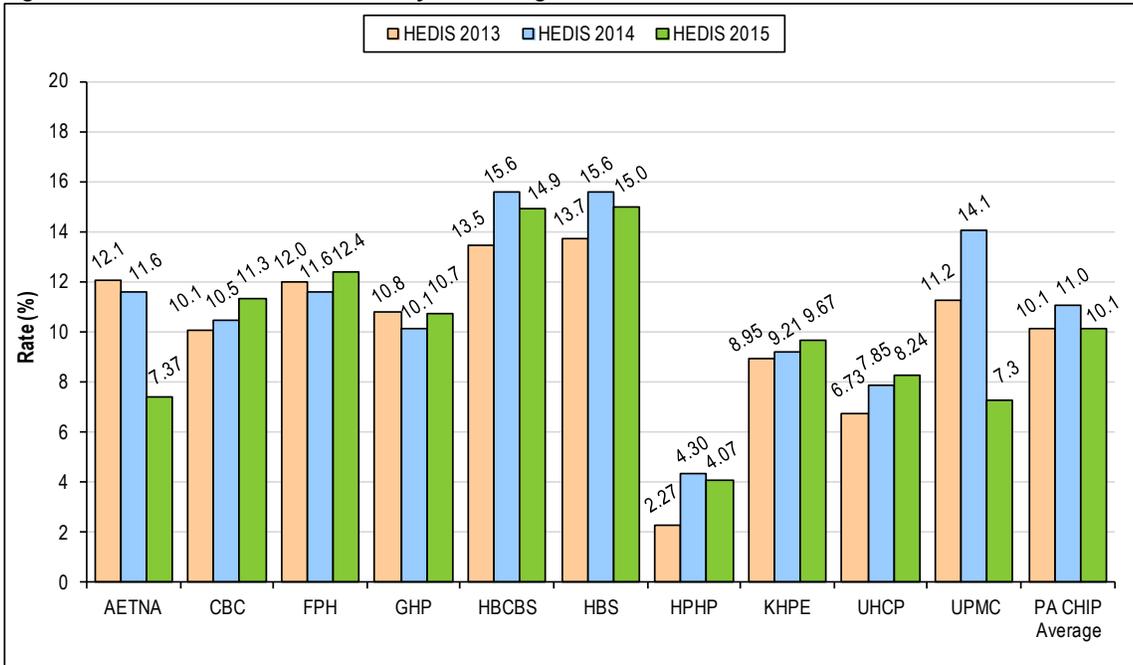

For adolescents 13 to 17 years old, the PA CHIP HEDIS® 2015 Mental Health Utilization – Any Services rate of 10.09% was 0.93 percentage points below the HEDIS® 2014 rate of 11.02%. Ten PA CHIP contractors reported rates for this measure. Five contractors reported increased rates and five contractors reported decreased rates from HEDIS® 2014 to HEDIS® 2015. Utilization rates ranged from a low of 4.07% to a high of 15.01%.

## EFFECTIVENESS OF CARE

HEDIS 2015 Measure	Description
<b>Weight Assessment and Counseling for Nutrition and Physical Activity (WCC)</b>	The percentage of members 3 - 17 years of age who had an outpatient visit with a PCP or OB/GYN and who had evidence of BMI percentile documentation, counseling for nutrition and counseling for physical activity during the measurement year.
<b>Childhood Immunization Status (CIS)</b>	This group of measures assess the percentage of children two years old who had four diphtheria, tetanus and acellular pertussis (DTaP); three polio (IPV); one measles, mumps and rubella (MMR); three haemophilus influenza type B (HiB); three hepatitis B (HepB); one chicken pox (VZV); four pneumococcal conjugate (PCV); one hepatitis A (HepA); two or three rotavirus (RV); and two influenza (flu) vaccines by their second birthday. One rate is calculated for each vaccine in addition to nine separate combination rates (Combinations 2 through 10).
<b>Immunizations for Adolescents (IMA)</b>	The percentage of adolescents 13 years of age who had one dose of meningococcal vaccine and one tetanus, diphtheria toxoids and acellular pertussis vaccine (Tdap) or one tetanus, diphtheria toxoids vaccine (Td) by their 13th birthday. One rate is calculated for each vaccine in addition to one combination rate.
<b>Human Papillomavirus Vaccine for Female Adolescents (HPV)</b>	The percentage of female adolescents 13 years of age who had three doses of the human papillomavirus (HPV) vaccine by their 13th birthday.
<b>Lead Screening in Children (LSC)</b>	The percentage of children two years old who had one or more capillary or venous lead blood tests for lead poisoning by their second birthday.
<b>Chlamydia Screening in Women (CHL)</b>	The percentage of women 16-24 years old who were identified as sexually active and who had at least one test for chlamydia during the measurement year
<b>Appropriate Testing for Children With Pharyngitis (CWP)</b>	The percentage of children two to 18 years of age who were diagnosed with pharyngitis, dispensed an antibiotic and received a group A streptococcus (strep) test for the episode. A higher rate represents better performance (i.e., appropriate testing).
<b>Appropriate Treatment for Children With Upper Respiratory Infection (URI)</b>	The percentage of children three months to 18 years of age who were given a diagnosis of upper respiratory infection (URI) and were not dispensed an antibiotic prescription.
<b>Use of Appropriate Medications for Children with Asthma (ASM)</b>	The percentage of members five to 19 years of age during the measurement year who were identified as having persistent asthma and who were appropriately prescribed medication during the measurement year.
<b>Follow-Up Care for Children Prescribed ADHD Medication (ADD)</b>	The percentage of children newly prescribed attention-deficit/hyperactivity disorder (ADHD) medication who had at least three follow-up care visits within a 10-month period, one of which was within 30 days of when the first ADHD medication was dispensed. Two rates are reported: Initiation phase and continuation and maintenance (C&M) phase.

## WEIGHT ASSESSMENT AND COUNSELING FOR NUTRITION AND PHYSICAL ACTIVITY (WCC)

### Measure Description

This set of measures assesses the percentage of members 3-17 years old who had an outpatient visit with a PCP or OB/GYN and who had evidence of Body Mass Index (BMI) percentile documentation, counseling for nutrition and counseling for physical activity during the measurement year.

### Weight Assessment and Counseling – Body Mass Index

### WCC BMI 3-17 Years: Results

### WCC BMI 12-17 Years: Analysis

The PA CHIP HEDIS® 2015 Weight Assessment and Counseling for Nutrition and Physical Activity – Body Mass Index documentation weighted average for adolescents 12-17 years old was 64.01%. This weighted average was 3.04 percentage points above the HEDIS® 2014 weighted average of 60.97%. Nine PA CHIP contractors reported rates for this measure. All nine contractors reported increased rates from HEDIS® 2014 to HEDIS® 2015 with BMI percentile documentation rates ranging from a low of 52.91% to a high of 84.46%.

## CHILDHOOD IMMUNIZATION STATUS (CIS)

### Measure Description

This group of measures assess the percentage of children two years old who had four diphtheria, tetanus and acellular pertussis (DTaP), three polio (IPV), one measles, mumps and rubella (MMR), three H influenza type B (HiB), three hepatitis B (HepB), one chicken pox (VZV), four pneumococcal conjugate vaccines (PCV), one hepatitis A (HepA), two or three rotavirus (RV) and two influenza (flu) vaccines by their second birthday. For this measure, one rate is calculated for each vaccine in addition to nine separate combination rates (Combinations 2 through 10). Results for the combination rates are presented below:

### Combination Vaccinations for Childhood Immunization Status<sup>2</sup>

## IMMUNIZATIONS FOR ADOLESCENTS (IMA)

### Measure Description

This group of measures assess the percentage of adolescents 13 years old who had one dose of meningococcal vaccine and one tetanus, diphtheria toxoids and acellular pertusis (Tdap), or one tetanus diphtheria toxoids (Td) vaccine by their 13<sup>th</sup> birthday. This measure calculates a rate for each vaccine and one combination rate.

### Meningococcal Vaccine

#### IMA Meningococcal Vaccine: Results

Table 3.37

IMA - Meningococcal	HEDIS 2015
PA CHIP Weighted Average	86.82%
PA Medicaid Weighted Average	83.82%
Quality Compass Percentile Benchmark Met – National	75 <sup>th</sup> percentile
Quality Compass Percentile Benchmark Met – Regional	75 <sup>th</sup> percentile

#### IMA Meningococcal Vaccine: Analysis

The PA CHIP HEDIS 2015 Immunizations for Adolescents – Meningococcal Vaccine weighted average was 86.82% which was 0.32 percentage points above the HEDIS 2014 weighted average of 86.50%. Ten PA CHIP contractors reported rates for this measure. Six contractors reported increased rates and four contractors reported decreased rates from HEDIS 2014 to HEDIS 2015. Meningococcal vaccine immunization rates ranged from a low of 78.43% to a high of 90.51%.

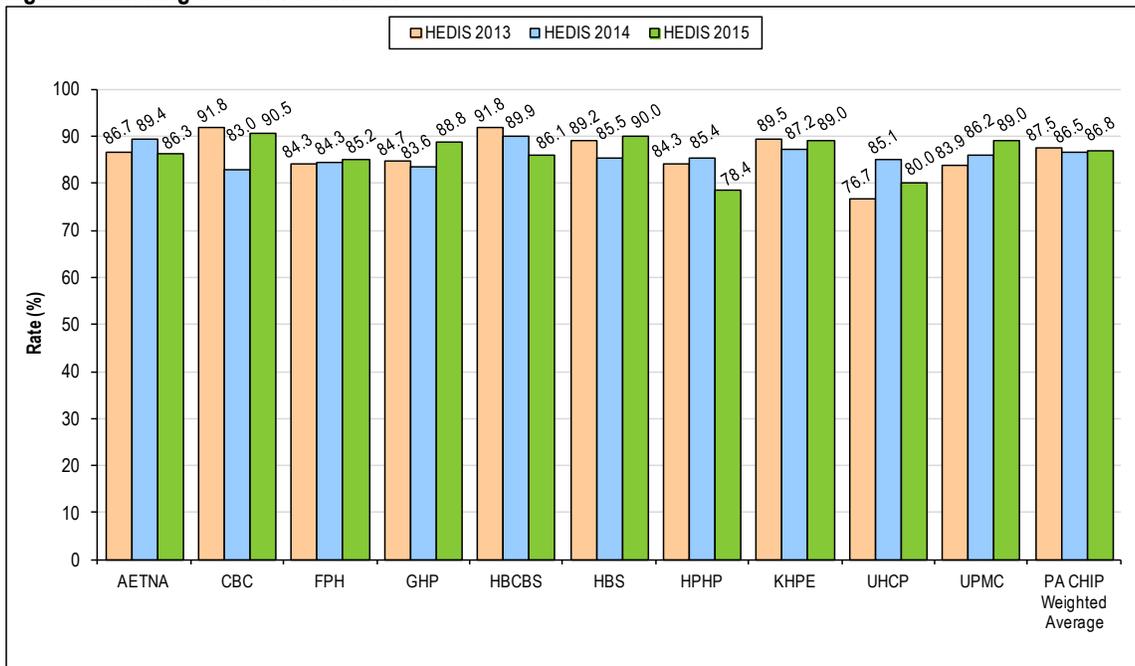

Table 3.38: Immunizations for Adolescents – Meningococcal Vaccine

# HUMAN PAPILLOMAVIRUS VACCINE FOR FEMALE ADOLESCENTS (HPV)

## Measure Description

The percentage of female adolescents 13 years of age who had three doses of the human papillomavirus (HPV) vaccine by their 13th birthday.

## HPV: Results

Table 3.43

HPV	HEDIS 2015
PA CHIP Weighted Average	23.00%
PA Medicaid Weighted Average	27.92%
Quality Compass Percentile Benchmark Met – National	50 <sup>th</sup> percentile
Quality Compass Percentile Benchmark Met – Regional	33.33 <sup>rd</sup> percentile

## HPV: Analysis

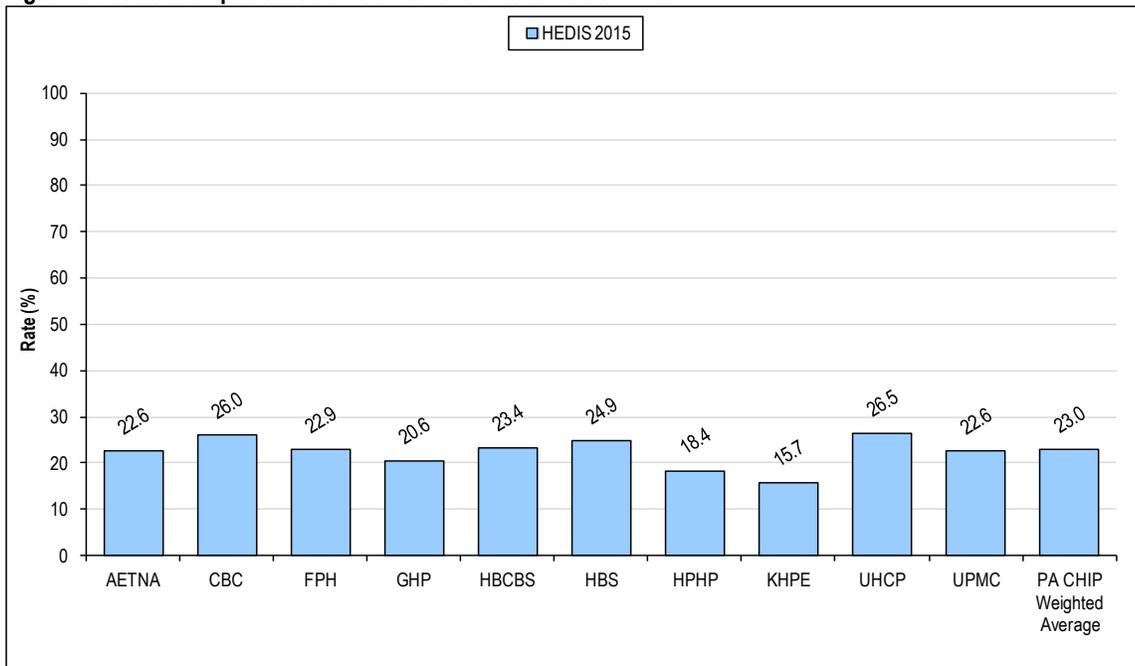

The PA CHIP HEDIS 2015 Human Papillomavirus Vaccine for Female Adolescents weighted average was 23.00%. Ten PA CHIP contractors reported rates for this measure with four contractors reporting rates above the weighted average and six contractors reporting rates below the weighted average. Vaccination rates ranged from a low of 15.66% to a high of 26.52%.

Table 3.44: Human Papillomavirus Vaccine for Female Adolescents (HPV)

- HEDIS 2015 is the first reporting year for this measure for PA CHIP contractors

**Figure 40: Human Papillomavirus Vaccine for Female Adolescents**

## LEAD SCREENING IN CHILDREN (LSC)

### Measure Description

The percentage of children two years old who had one or more capillary or venous lead blood tests for lead poisoning prior to their second birthday.

### LSC: Results

Table 3.45

LSC	HEDIS 2015
PA CHIP Weighted Average	52.86%
PA Medicaid Weighted Average	77.24%
Quality Compass Percentile Benchmark Met – National	10 <sup>th</sup> percentile
Quality Compass Percentile Benchmark Met – Regional	Below 10 <sup>th</sup> percentile

### LSC: Analysis

The PA CHIP HEDIS 2015 Lead Screening in Children weighted average at 52.86% was 2.96 percentage points above the HEDIS 2014 weighted average of 49.90%. Ten PA CHIP contractors reported rates for this measure with five contractors reporting increased rates and five contractors reporting decreased rates from HEDIS 2014 to HEDIS 2015. Lead screening rates ranged from a low of 26.54% to a high of 66.51%.

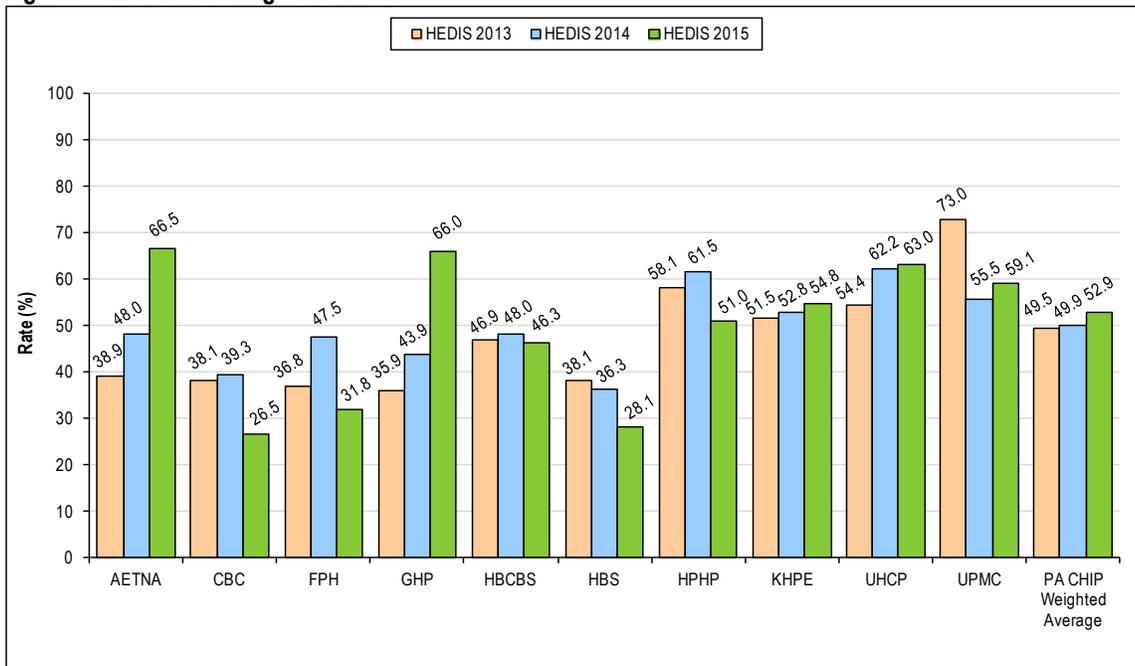

Table 3.46: Lead Screening in Children

## APPROPRIATE TESTING FOR CHILDREN WITH PHARYNGITIS (CWP)

### Measure Description

This measure assesses the percentage of children two to 18 years old, who were diagnosed with pharyngitis, were prescribed an antibiotic, and who were given a group A streptococcus test.

### CWP: Results

Table 3.49

CWP	HEDIS 2015
PA CHIP Weighted Average	80.90%
PA Medicaid Weighted Average	68.37%
Quality Compass Percentile Benchmark Met – National	75 <sup>th</sup> percentile
Quality Compass Percentile Benchmark Met – Regional	50 <sup>th</sup> percentile

### CWP: Analysis

The PA CHIP HEDIS 2015 Appropriate Testing for Children with Pharyngitis measure weighted average was 80.90% which was 3.65 percentage points above the HEDIS 2014 weighted average of 77.25%. Ten PA CHIP contractors reported rates for this measure. Nine contractors reported increased rates and one contractor reported a decreased rate from HEDIS 2014 to HEDIS 2015. Appropriate testing rates ranged from a low of 71.78% to a high of 89.83%.

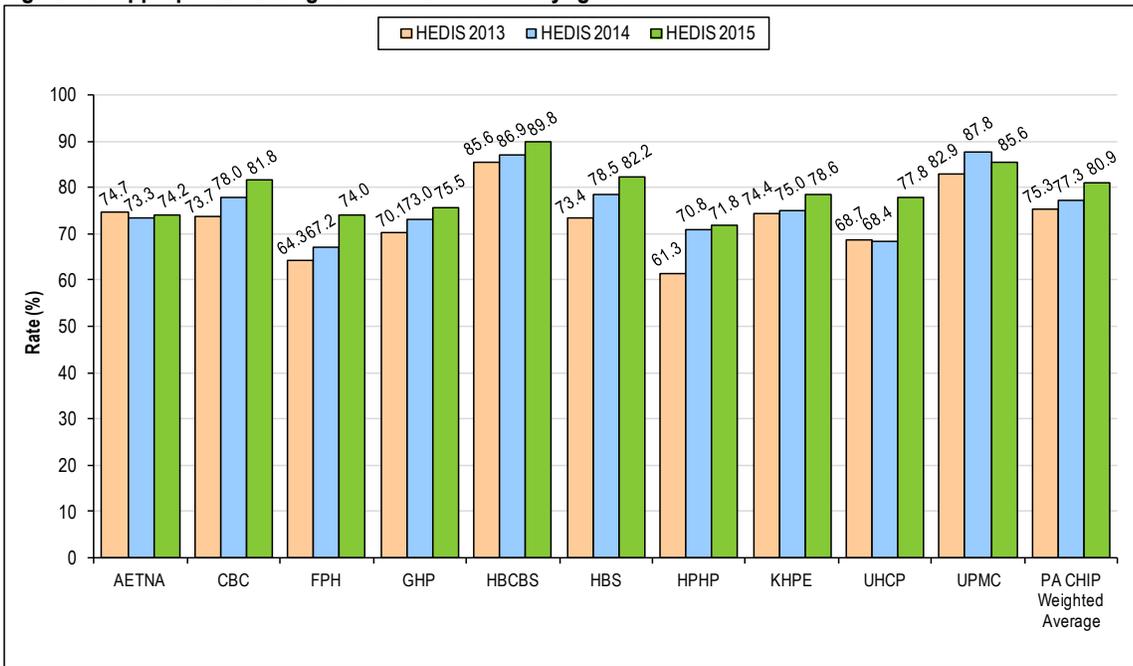

Table 3.50: Appropriate Testing for Children with Pharyngitis

## APPROPRIATE TREATMENT FOR CHILDREN WITH UPPER RESPIRATORY INFECTION (URI)

### Measure Description

The Appropriate Treatment for Children with Upper Respiratory Infection measure assesses the percentage of children three months to 18 years old who were diagnosed with an upper respiratory infection and who were not prescribed an antibiotic.

### URI: Results

Table 3.51

URI	HEDIS 2015
PA CHIP Weighted Average	85.38%
PA Medicaid Weighted Average	88.57%
Quality Compass Percentile Benchmark Met – National	25 <sup>th</sup> percentile
Quality Compass Percentile Benchmark Met – Regional	Below 10 <sup>th</sup> percentile

### URI: Analysis

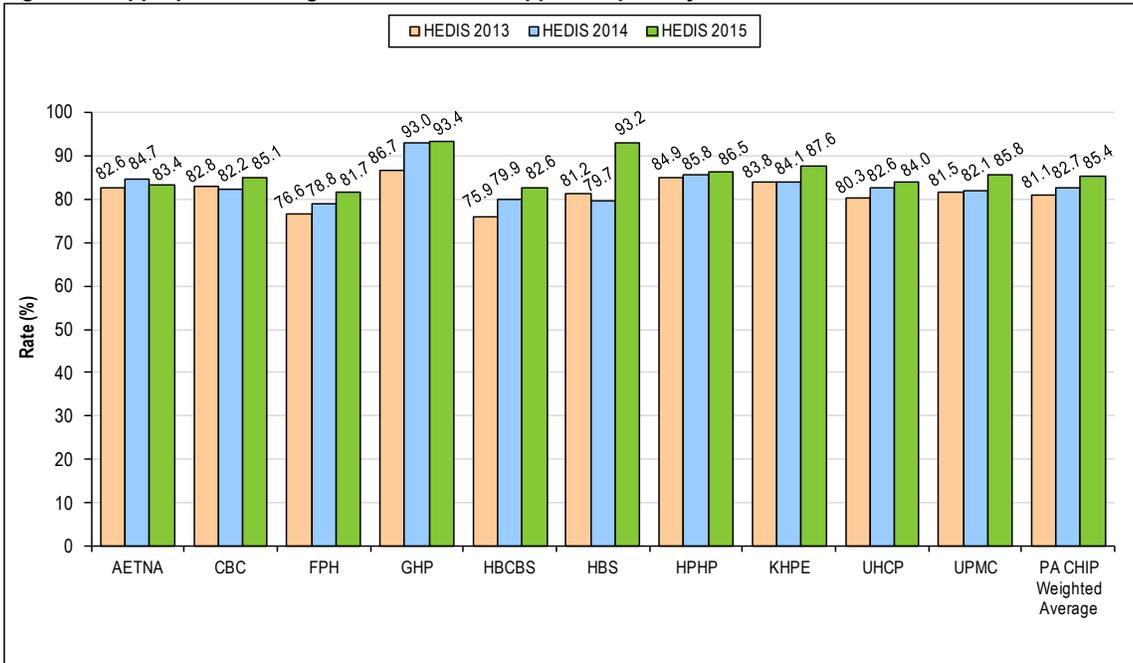

The PA CHIP HEDIS 2015 Appropriate Treatment for Children with Upper Respiratory Infection weighted average was 85.38% which was 2.68 percentage points above the HEDIS 2014 weighted average of 82.70%. Ten PA CHIP contractors reported rates for this measure with nine contractors reporting increased rates and one contractor reporting a decreased rate from HEDIS 2014 to HEDIS 2015. Appropriate URI testing rates ranged from a low of 81.67% to a high of 93.36%.

# USE OF APPROPRIATE MEDICATIONS FOR PEOPLE WITH ASTHMA (ASM)

## Measure Description

The Use of Appropriate Medications for Children with Asthma assesses the percentage of children five to 19 years old who were identified as having persistent asthma, and who were appropriately prescribed medication to control their condition.

## ASM 5-19 Years: Results

Table 3.53

ASM Age 5 – 19 Years	HEDIS 2015
PA CHIP Weighted Average	92.40%
PA Medicaid Weighted Average*	90.06%
Quality Compass Percentile Benchmark Met – National*	NA
Quality Compass Percentile Benchmark Met – Regional*	NA

- PA MMC rate includes members 5-18 years of age
- Medicaid benchmarks are not available for the 5-19 age range

## ASM 5-19 Years: Analysis

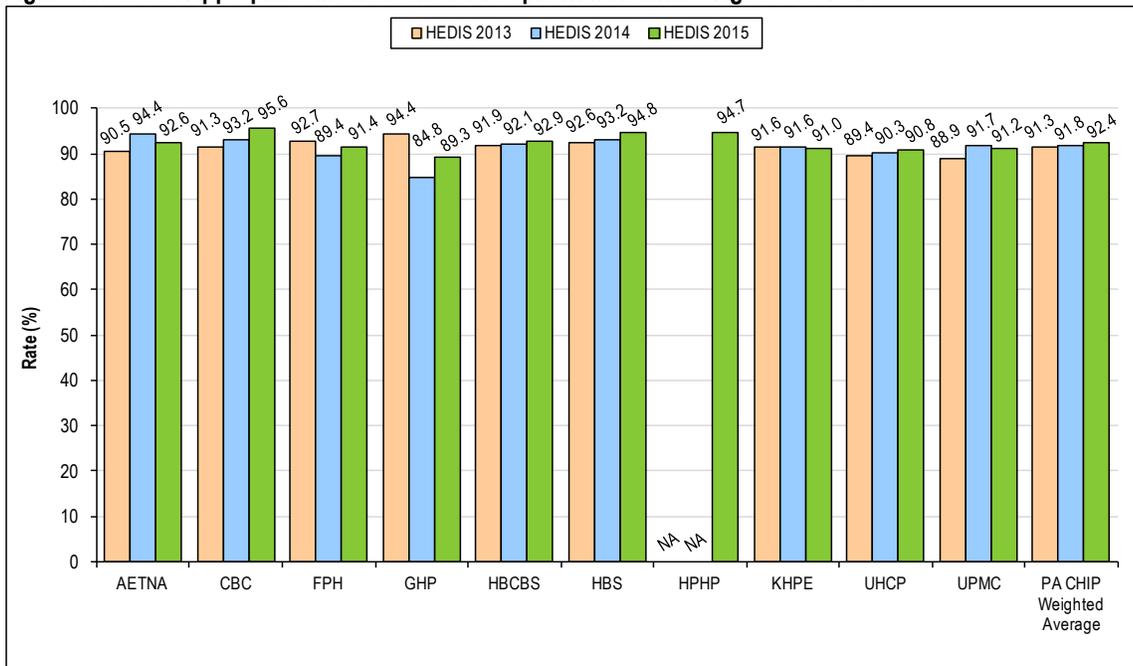

The PA CHIP HEDIS 2015 Use of Appropriate Medications for Children with Asthma weighted average for children five to 19 years old at 92.40% was 0.61percentage points above the HEDIS 2014 rate of 91.79%. Ten PA CHIP contractors reported rates for this measure. Six contractors reported increased rates and three contractors reported decreased rates from HEDIS 2014 to HEDIS 2015. Appropriate asthma medication rates ranged from a low of 89.29% to a high of 95.56%.

Table 3.54: Use of Appropriate Medications for People with Asthma – Ages 5-19 Years

## FOLLOW-UP CARE FOR CHILDREN PRESCRIBED ADHD MEDICATION (ADD)

### Measure Description

The Follow-Up Care for Children Prescribed ADHD Medication measure assesses the percentage of children six to 12 years old, newly prescribed ADHD medication, who have at least three follow-up care visits, one of which occurs within 30 days of when the first ADHD medication was dispensed.

### ADD Initiation Phase: Results

Table 3.59

ADD Initiation Phase	HEDIS 2015
PA CHIP Weighted Average	45.85%
PA Medicaid Weighted Average	24.99%
Quality Compass Percentile Benchmark Met – National	66.67 <sup>th</sup> percentile
Quality Compass Percentile Benchmark Met – Regional	75 <sup>th</sup> percentile

### ADD Initiation Phase: Analysis

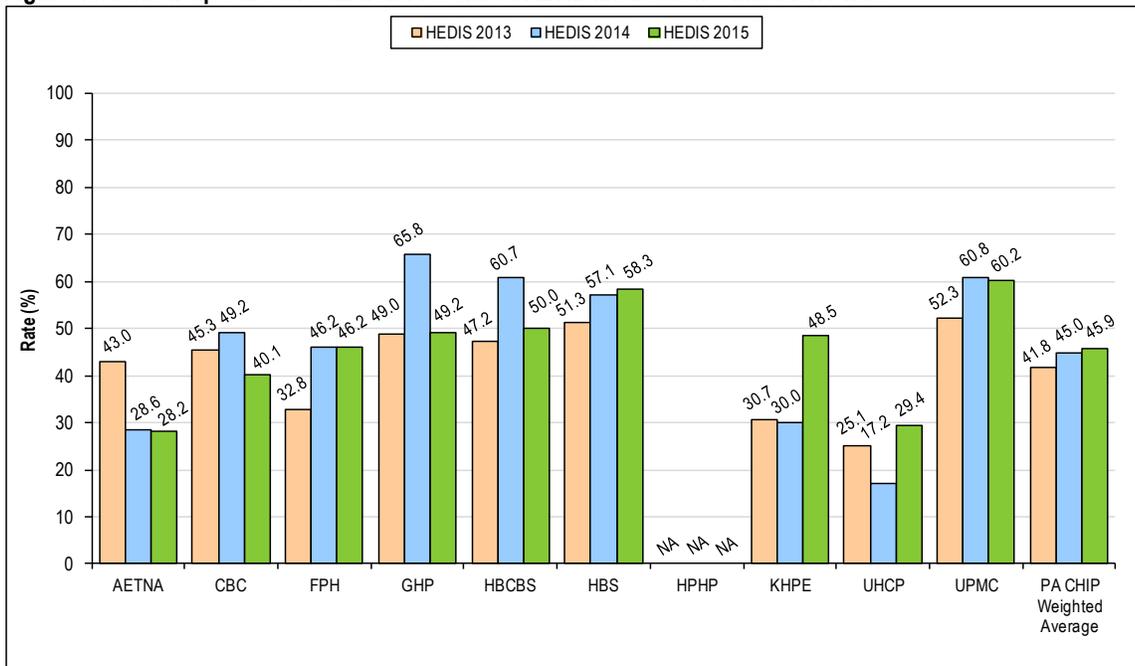

The PA CHIP HEDIS 2015 Follow-Up Care for Children Prescribed ADHD Medication – Initiation Phase weighted average at 45.85% was 0.88 percentage points above the HEDIS 2014 rate of 44.97%. Nine PA CHIP contractors reported rates for this measure with three contractors reporting increased rates, one contractor reporting a similar rate and five contractors reporting decreased rates from HEDIS 2014 to HEDIS 2015. ADHD follow-up Initiation phase rates ranged from a low of 28.16% to a high of 60.21%.

## FOLLOW UP CARE AFTER HOSPITALIZATION FOR MENTAL ILLNESS (FUH)

### Measure Description

The follow-up care after hospitalization for mental illness measure assesses the percentage of discharges for members six years of age and older who were hospitalized for treatment of selected mental health disorders, and who had an outpatient visit, an intensive outpatient encounter or partial hospitalization with a mental health practitioner.

### FUH 7 Days: Analysis

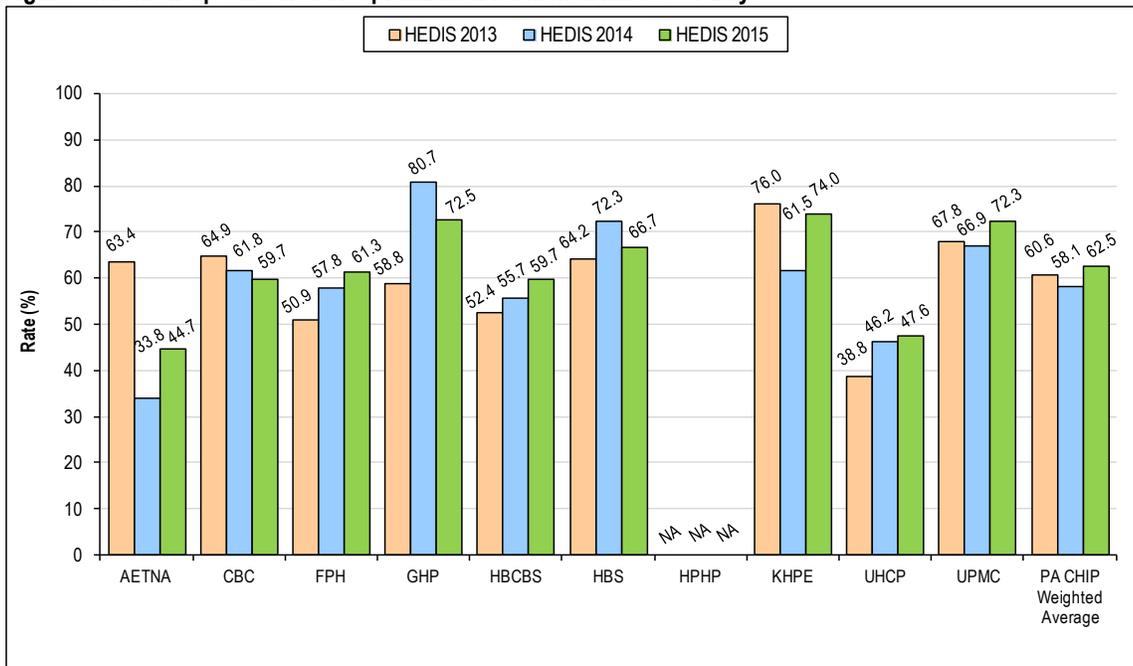

The PA CHIP HEDIS 2015 Follow-Up Care after Hospitalization for Mental Illness - 7 days weighted average was 62.46% which was 4.39 percentage points above the HEDIS 2014 weighted average of 58.07%. Nine PA CHIP contractors reported rates for this measure with six contractors reporting increased rates and three contractors reported decreased rates from HEDIS 2014 to HEDIS 2015. Seven-day follow-up rates ranged from a low of 44.69% to a high of 74.00%.

**Table 3.63: Follow-up Care after Hospitalization for Mental Illness – 7 Days**

HEDIS 2013	HEDIS 2014	HEDIS 2015	PA CHIP Contractor
